

# Medical Instrument Interfacing Middleware

Empowering Medical Instrument Connectivity and  
Data Automation

# We are Experts in Medical Instrument Interfacing

*With our Advanced Middleware*

Seamlessly connects diagnostic devices, imaging systems, lab equipment, and health management systems.

## Comprehensive Platform

Yoctobe Medical Interfacing Platform (MIP) is a robust middleware solution designed to integrate and automate the flow of data between medical instruments, laboratories, imaging systems, and healthcare information systems (HIS).

### Why it matters?

Automates processes, reduces human error, and streamlines healthcare workflows for enhanced patient care.

### Why Yoctobe?

**Unmatched Expertise:** Yoctobe's platform provides end-to-end connectivity for all medical devices, regardless of type or manufacturer.

**Scalability:** Easily integrates with small clinics or large hospitals, handling increasing data loads and device integrations.

**Security & Compliance:** Compliant with GDPR and HIPAA for secure data exchanges and patient privacy.  
Trust Yoctobe for: Reliable, efficient, and automated data management in medical environments.

### Huge Benefits of Automation

**Automated Data Capture:** Real-time collection and normalization of data from various devices.

**Customizable Workflows:** Tailored automation for test result processing, alert systems, and patient data management.

**Error Reduction:** Automates routine processes, reducing manual data entry and potential for human error

## About Yoctobe

Yoctobe LTD is a UK-registered technology company specializing in healthcare automation and AI-driven interoperability solutions. Established in England & Wales, Yoctobe operates under Company No: 16256967, with its registered office at 49 Jamaica Street, Liverpool, L1 0AH, United Kingdom. Committed to innovation, Yoctobe develops cutting-edge solutions to enhance efficiency in healthcare, supporting caregivers and institutions with intelligent, privacy-focused technology.
